FEATHER®

pfm medical gmbh offers a broad range of FEATHER® microtome blade holders for use with disposable microtome blades for paraffin and cryostat sectioning in a wide range of individual applications in routine practice, research and industry.

www.pfmmedical.com

pfm medical gmbh offers a broad range of **FEATHER® microtome blade holders** for use with disposable microtome blades for paraffin and cryostat sectioning in a wide range of individual applications in routine practice, research and industry.

130A

Use

The microtome blade holder Type 130A has been specially developed for rotary and freezing microtomes.

Details

- Dispenser with 50 S35 disposable microtome blades included

Technical Data

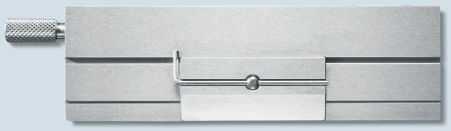
- **Material:** stainless steel
- **Length:** 130 mm

Ordering Information

Type 130A

REF 207000130

130AE



Use

The microtome blade holder Type 130AE has been specially developed for rotary microtomes.

Details

- Microtome blade holder with fast clamping device
- Dispenser with 50 S35 disposable microtome blades included

Technical Data

- **Material:** stainless steel
- **Length:** 130 mm

Ordering Information

Type 130AE

REF 207000131

130C-A

Use

The microtome blade holder Type 130C-A has been specially developed for cryostats.

Details

- Dispenser with 20 C35 disposable microtome blades included

Technical Data

- **Material:** stainless steel
- **Length:** 130 mm

Ordering Information

Type 130C-A

REF 207000132

130C-CR

Use

The microtome blade holder Type 130C-CR has been specially developed for Bright FC/FCS and Cambridge Rocker cryostats.

Details

- Dispenser with 20 C35 disposable microtome blades included

Technical Data

- **Material:** stainless steel
- **Length:** 130 mm

Ordering Information

Type 130C-CR

REF 207000134

160

Use

The microtome blade holder Type 160 has been specially developed for sliding and rotary microtomes.

Details

- Dispenser with 50 S35 disposable microtome blades included

Technical Data

- **Material:** stainless steel
- **Length:** 160 mm

Ordering Information

Type 160

REF 207000160

160C

Use

The microtome blade holder Type 160C has been specially developed for cryostats.

Details

- Dispenser with 20 C35 disposable microtome blades included

Technical Data

- **Material:** stainless steel
- **Length:** 160 mm

Ordering Information

Type 160C

REF 207000162

160E

Use

The microtome blade holder Type 160E has been specially developed for sliding microtomes.

Details

- Microtome blade holder with fast clamping device
- Dispenser with 50 S35 disposable microtome blades included

Technical Data

- **Material:** stainless steel
- **Length:** 160 mm

Ordering Information

Type 160E

REF 207000161

240D

Use

The microtome blade holder Type 240D has been specially developed for sliding microtomes.

Details

- Extra-long microtome blade holder with two fixing plates
- Dispenser with 50 S35 disposable microtome blades included

Technical Data

- **Material:** stainless steel
- **Length:** 240 mm

Ordering Information

Type 240D

REF 207000241

240E

Use

The microtome blade holder Type 240E with fast clamping device has been specially developed for sliding microtomes.

Details

- Extra-long microtome blade holder with fast clamping device
- Suitable for disposable microtome blades S35L/ S35LL

Technical Data

- **Material:** stainless steel
- **Length:** 240 mm

Ordering Information

Type 240E

REF 207000242

240S

Use

The microtome blade holder Type 240S has been specifically developed for sliding microtomes.

Details

- Extra-long microtome blade holder with one fixing plate
- Dispenser with 50 S35 disposable microtome blades included

Technical Data

- **Material:** stainless steel
- **Length:** 240 mm
