
Invitation

IBSD 2026

**14th International Breast
Symposium Düsseldorf**

24.04. - 25.04.2026

Areal Böhler - Alte Federnfabrik
Düsseldorf

www.pfmmedical.com

We are delighted to invite you to the pfmmedical booth during the 14th International Breast Symposium (IBSD) in Düsseldorf, from April 24-25, 2026.

Join us to explore the latest in mesh-supported breast reconstruction, featuring our titanised mesh implants **TiLOOP® Bra** for sub-pectoral, universal use and **TiLOOP® Bra Pocket** for pre-pectoral use.

Titanisation of Mesh Implants

Using a process that is unique worldwide, we titanise our meshes, thereby transferring the advantages of titanium to a flexible, elastic surface.

Are you interested in learning more about how titanisation may apply to your clinical practice and wondering what benefits it could offer your patients undergoing reconstruction?

Come to our booth in Hall 6 - we will answer your questions and look forward to an interesting exchange.

Connect with Our Experts

Discover how our solutions can support your clinical work. Meet with our team in person to discuss your specific needs and see our products firsthand.

We look forward to welcoming you in Düsseldorf!
